SEKUNCE

INVIZ

Secure, Private, Zero-Log Voice Communication

ABOUT US
WHO WE ARE

SEKUNCE is a pioneering telecom technology company delivering innovative solutions to enhance network security, reliability, and privacy.

Our core platforms—SHIELD, TRIBE, and INVIZ—empower operators, enterprises, and high-security sectors with secure, encrypted communication tools. Supporting cloud, on-premises, or hybrid deployments, SEKUNCE's modular architecture offers scalable, real-time analytics, fraud prevention, and privacy compliance.

INTRODUCING
INVIZ

INVIZ is a state-of-the-art secure voice calling solution designed for environments where confidentiality is paramount. It provides end-to-end encrypted voice calls with zero data logging, ensuring complete privacy for high-risk business communications, government operations, legal firms, and other sensitive sectors..

KEY FEATURES

- **End-to-End Encryption:** Using AES-256 and WebRTC for ultra-secure voice calls.
- **Zero Data Logging:** No recordings, no storage—your conversations stay private.
- **Anti-Tapping & Tracking:** Features like white noise injection and speakerphone alerts prevent eavesdropping.
- **Trusted for Critical Environments:** Perfect for government, legal, financial, and healthcare sectors.

BUSINESS BENEFITS

- **Maximum Confidentiality:** Secure sensitive discussions with absolute privacy.
- **Meeting Regulatory Needs:** Supports compliance in high-security industries.
- **No Storage Risks:** Eliminates data breach concerns with zero data retention.
- **Trusted by High-Recurity Sectors:** Ideal for legal professionals, government agencies, and enterprises handling classified information.

WHY INVIZ

- Ultimate Privacy & Security
- Fully Encrypted, No Logs
- Trusted in High-Risk Environments
- Simple Integration & Deployment

Absolute Privacy, Unmatched Security.
